Partial C/C++ Function List

This list of functions is incomplete, but will be updated when possible to eventually fill the list to all library functions.

A note about C vs. C++

Note that header files from the C standard library should have the form headername.h when used in a C program, and the form cheadername when used in C++ programs (note the c as a prefix). For instance, in a C program the stdlib header file would be included as follows

```
#include <stdlib.h>
```

whereas in a C++ program it would be included like this:

```
#include <cstdlib>
```

Functions Listed Alphabetically

- abort()
- abs()
- acos()
- asin()
- atan()
- atexit()
- atof()
- atoi()
- atol()
- ceil()
- clock()
- cosh()
- ctime()
- div()
- exit()
- fabs()
- floor()
- fmod()
- getchar()
- getenv()
- isalnum()
- isalpha()
- isdigit()
- isgraph()
- ispunct()
- isspace()
- isupper()
- kbhit()
- log10()
- log2()
- log()
- memcmp()
- modf()
- pow()

- putchar()
- putenv()
- puts()
- rand()
- remove()
- rename()
- sinh()
- sqrt()
- srand()
- strcat()
- strcmp()
- strerror()
- time()
- tolower()
- toupper()
